About the Company

Gigabytesmind Technologies is fully owned by a young black woman, Ms Johanna Mokgaedsi Moabelo. The company was registered in 2018 with the CIPC (Registration number: 2018/237287/07. Gigabytemind technologies PTY LTD offers remote or onsite services that manage organizations technological assets, computer training as well as business branding. Managing IT also involves the creation, optimization, and accessibility aspects of a company. With seeing a need of computer literacy among the youth, we saw it fit to offer computer training as one of our scope of services.

There is a growing trend of individuals venturing into entrepreneurship, which makes business branding more and more required by these folk. We advertise as much as possible to ensure we spread the message of why business branding and marketing is important. Gigabytes Technologies (Pty)Ltd offers business branding and business marketing as a service that we consider it to be growing in importance.

The goal is to help businesses manages their IT goals and keep running a tip-toe shape. We are growing everyday hence our main objective is to reach within both and international market within the IT sector. We are not restricted to anything regarding information technology, we offer services from Computer Architecture, Networking up to Software development. We cater small to large scales of projects for both private and government sectors.

We are a team of computer specialists, young, flexible and innovative.

We strive on ensuring our service delivery is at optimal level. Absolute excellence being our tag line, our commitment is vital to our business growth by providing meaningful services to the public.

Our work our Pride.

VISION

Our vision revolves around ensuring the running of the company practices the below:

- Professionalism
- Good work ethic
- Punctuality
- Flexibility- supports several projects simultaneously
- Quality service

MISSION

To deliver the best product and service in the most cost efficient way possible to any client and to build healthy business relations in the industry that knows us by reputation. We pride ourselves on our professional approach and high level of service. Our attention to detail and close supervision ensures that every job undertaken is performed to the highest standard and we endeavour to exceed the expectations of our clients every step of the way.

OBJECTIVES

Our objectives include:

- Be a reputable service provider by providing quality service.
- Successfully train the youth on computer literacy.
- Provide quality business brands.
- Provide quality IT solutions.
- Inspire businesses.
- Become a change agent for female business owners.

CREATING NEW VALUES

We work a broad range of clients, our clients and partners have close relation to some of up and coming companies. We highly aim to get aspiring entrepreneurs more eager to enter the business world. We understand that jobs won't create themselves more and more businesses should be created. Using our combined experience, technical expertise and local knowledge, we're able to deliver projects and services that contribute to the community, our economy and future generations.

BREAING FRONTIERS

Offering IT solutions, training programmes, graphic designing, motion graphics and web development are becoming a niche and increasingly important. Building a brand is not the mere designing of a business logo and marketing but revolves around building hype and recognition of a business. Effective communication of what a business stands for, is our bottom line goal. We are solely motivated to finding new ways to get a business out there into the world.

OUR PEOPLE

We are a company that prides itself on its 'family' culture and we seek out high-calibre people. We are a company that has, at its core, a team philosophy that is clearly apparent each and every day – there is a real sense of being there for one another. We believe in nurturing the skills of our team members and providing growing levels of responsibility.

OUR CORPORATE RESPONSIBILITY

GigabytesMind Technologies (Pty)Ltd recognises its obligations to act responsibly, ethically and with integrity in all its dealings, its staff, customers and the environment.

BROAD BASED BLACK ECONOMIC EMPOWERMENT

The company conforms to the BBB-EE Act through compliance with the seven key elements of BBB-EE namely:

- Ownership
- Management Control
- Employment Equity
- Skills Development
- Preferential Procurement
- Enterprise Development
- Socio-Economic Development

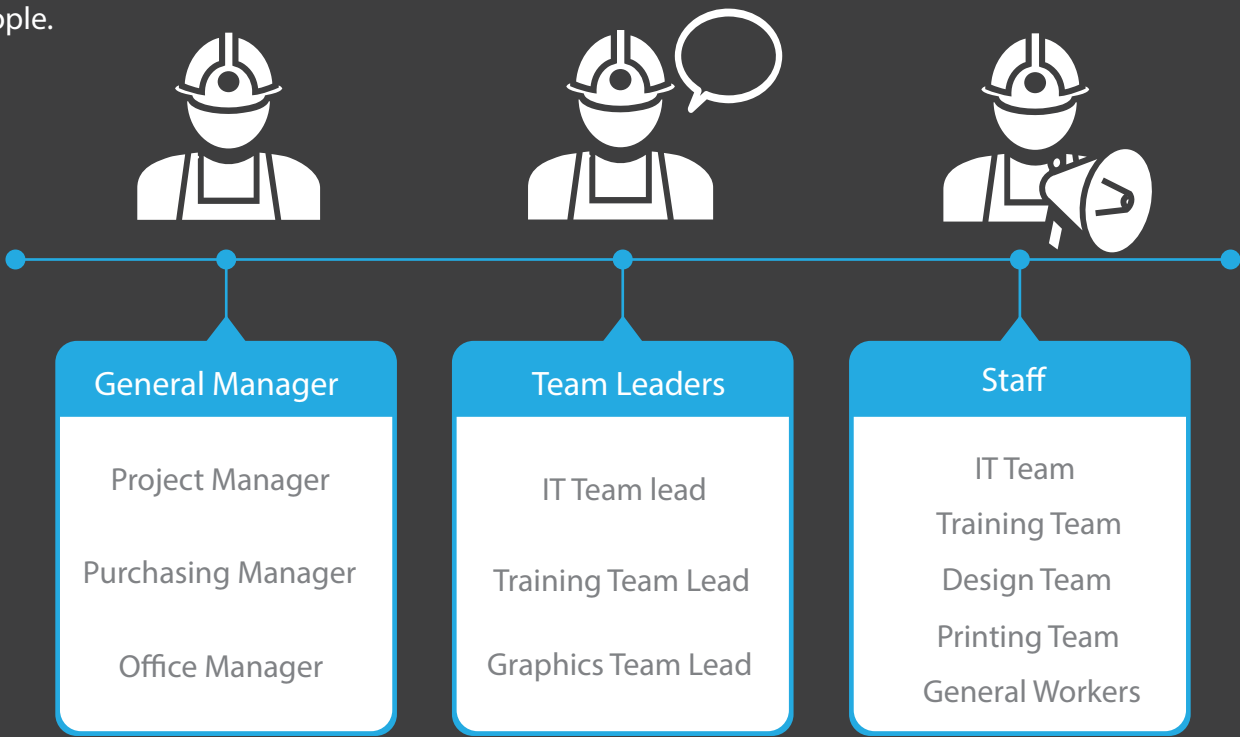

MBS is 100% black-owned and managed by a dynamic and multi-skilled staff complement consisting of highly qualified and experienced young men and women.

OWNERSHIP	100% Black Owned
GENDER OWNERSHIP	100% Female owned
STAFF	100% Black
STAFF GENDER	40% Female & 60% Male

ORGANISATIONAL STRUCTURE

Gigabytes Technologies (Pty)Ltd prides itself on its ‘family’ culture and we seek out and attract high-calibre people.

About the Owner

Johanna Mokgaedsi Moabelo is the founder and director of Gigabytesmind Technologies (Pty) Ltd. She comes from a place called Hammanskraal far North of Pretoria. She studied Information Technology and worked with different colleges as lecturer, and also registered as an Assessor and a Moderator with mict seta. Her love and passion for information Technology drove her to register a company in 2018 to date.

She is hardworking, motivated and assertive. Her goal is to create and jobs and visual learning across the all borders.

She has always had a passion for business and providing a service that has true value to the public at large. Seeing that she is highly inclined to technicalities of computers, training others and building better business appearances of other businesses, Johanna saw it fit to incorporate GigabytesMind Technologies (Pty)Ltd. She aims to continuously grow it and ensure its client base is increased.

MESSAGE FROM THE OWNER

"I believe that every dream dreamt as purpose, dreams are a glimps into the future but only if they are truly worked on. You can't dream and not put in the effort to ensure those dreams materialize. All business owners and aspiring entrepreneurs should put in the work to ensure their passions come into reality.

Put in enough effort to work on your dreams. If you do not do it yourself then stop dreaming and live an ordinary life."

- Johanna Mokgaedsi Moabelo
Owner of GigabytesMind Technologies (Pty)Ltd

NETWORK AND SYSTEMS SERVICES

LAN and WAN Designing

Keeping your business running smoothly requires building and maintaining a robust, highly available network. Gigabytesmind Technologies (Pty)Ltd offers proven network design and implementation services that drive results for your business. From wireless networking with VoIP, to multi-location WAN intranets with mobile-ready remote access, to cloud-based storage and retrieval systems, Gigabytesmind Technologies (Pty)Ltd has the experience and capacity to deliver reliable, single vendor solutions.

VPN IPSEC

The VPN is a data network connection that makes use of the public telecommunication infrastructure, but maintains privacy through the use of a tunneling protocol and security procedures. IPSec is a protocol, which runs atop the VPN, and is used for securing the internet traffic across the VPN tunnel. We boast skills in configuring VPN access across multi-vendor platforms such as Cisco, Juniper, Sonic, Check Point, and many more.

Advantages: Increase your office productivity by accessing the Corporate LAN from your home, airport, or hotel room, through the public internet over a secure VPN tunnel.

Technical Support and Maintenance

We provide technical support to all the applications that we have been involved in development of. Our technicians are available to provide 24/7 support and maintenance when so required. We also provide maintenance and support services to computers, peripherals and Local Area Network.

L3 MPLS VPN Design and Implementation

Multiprotocol Label Switching (MPLS) is a mechanism in high-performance telecommunications networks which directs and carries data from one network node to the next. MPLS makes it easy to create "virtual links" between distant nodes. It can encapsulate packets of various network protocols.

Advantages: Cost effective solution with QoS capabilities, increased response time and improved application performance through reduced "hops" between network points, less or no downtime as redundant paths are made available in the MPLS cloud which allow quick traffic re-routing, providing continued application availability. We have skilled people in configuring MPLS on multi-vendor platforms such as Cisco, Juniper, Mikrotik, and many more

Dedicated Server Design

We have experience in designing standard alone application servers for corporate clients, our experience covers the below areas:

- Mail Server installation and configuration on Linux and Windows Platforms
- Mail server optimization i.e. security, upgrades, etc.
- DNS deployment, design and recovery on both windows and Linux platform
- Backup Server design and deployment
- Offering proven network design and implementation services that drive results to your business

WHY CHOOSE GIGABYTESMIND TECHNOLOGIES (PTY)LTD?

VALUE FOR MONEY SOLUTIONS

With an industry experience of 6+ years we use refined processes to give cost advantage to all our clients. We specialize in delivering best solutions at your budget price.

EXCELLENCE

We employ seasoned experts with significant experience in diversified domains and equipped with all the emerging technologies to develop the best software and web solutions for you.

TECHNICAL SUPPORT

We offer FREE one year technical support after project completion to make sure that our clients don't face any problem even after the development is over.

TURNAROUND TIME

We believe in completing all our projects before deadline to ensure client satisfaction and spare sufficient buffer time to modify design if needed as per client feedback.

DIY Wipes

The Roxton Do it Yourself DIY wipes offer you the flexibility to create your own unique product.

We pay great care in making sure ordered products are delivered on time.

We take COVID seriously and continuously advise everyone to follow suit.

Business Branding

Branding is one of the most important aspects of a successful business. It's the first impression you give to your audience and it's what makes you stand out among your competition. Your brand is a direct reflection of what your customers should expect from you. It's your voice, your mission, your marketing materials, your packaging, your website. It's the reason people will choose you over others. Simply put, branding is not just a logo. For small businesses especially, it's important to attract and retain loyal customers and branding will do just that. If you're on the fence about branding, here are benefits you may want to consider:

1. Branding helps you stand out in a saturated market.

If you're a small business or creative entrepreneur, you may have realized by now that there are a lot of us! It's common for people to find a quick solution and buy a logo for R450, but they probably don't have a set strategy for their brand. There's no meaning behind their logo and it might not even make sense for their target audience. A good brand has a clear purpose and will help you stand out among other people in your field. Maybe what you offer or your style is similar to your competition, but clients and customers will choose you because of your brand, your whole package and vibe. First impression is everything.

2. Branding gives you credibility.

Having an established and clear brand will make you look like an expert. If you appear to know what you're talking about and come across as a professional, people will be more likely buy from you.

3. With a clear brand, you can charge what you're worth.

It can be hard to get your first clients and customers. In order to start making money, sometimes you just have to take whatever you can get. Many times, you may charge way less than what you deserve just to gain some traction in your business. With a solid brand established, you will come across as a professional and therefore you can charge like one! If you show that you produce high quality work or products, clients will be more likely to value what you offer and pay higher prices for it.

4. Branding leads to customer loyalty.

Good branding elevates a business and builds recognition and loyalty. Customers are attracted to brands that share similar values with them. When you showcase what you value through branding, customers will develop an emotional connection to you. For example, I could go into any Kroger or Target and pick up a regular notebook, planner or calendar, but instead I buy from Appointed because their brand resonates with me. Brand loyalty can often last a lifetime, which leads me to the next benefit of branding.

5. Branding leads to returning customers & referrals.

If you deliver what your brand promises, your customers will remember you. Your clients and audience can be the best form of marketing. If they ever need your services or products in the future, they will think of you first and will most likely refer you to their friends.

6. Branding = Consistency.

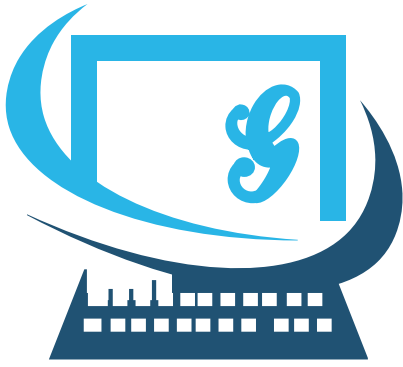

With solid branding in place, you can easily keep things consistent and make decisions more quickly when it comes to your customer experience. You won't have to constantly question yourself on the little things like, "What font should I use? What color should I use? How should this look?" With a brand style guide, all of those things will be set.

7. Branding helps to attract your ideal clients.

As I said before, people connect with brands that share the same values. If your brand clearly represents your business, you'll be more likely to attract the right people. For example, if you have a high-end floral business and you want to attract a higher-paying client, your branding needs to be in line.
